Narrandera consultations this Friday Seeking views of organic producers

Have your say on the future of the organic industry

Policy Partners Pty Ltd is conducting regional consultations, seeking the views of organic producers about the future leadership of their industry.

The consultations are part of a project initiated by organic industry leaders from across Australia who are collaborating with a view to establishing a harmonised national voice for all organic producers, certifiers and the supply chain.

This workshop is being sponsored by BioAg Pty Ltd, a local agricultural services company based in Narrandera, and the Riverina Organic Farmers Organisation.

Tony Webster, Managing Director of Policy Partners, said "The consultations are part of a project to produce a roadmap for the industry. One possible path in that roadmap is the creation of a new national peak body to provide a harmonised voice for the organic industry."

The 2½ hour consultation workshop will be held in Narrandera at 9.30am on this Friday 25th August. Policy Partners has published an Issues Paper to guide the consultations. For further information, visit the project website at www.organicindustries.com.au

RSVP is required for catering purposes. Please email enquiries@organicindustries.com.au or phone/text Tony Webster on 0448439334 to register.

Background

The Australian Organic Industry Working Group has appointed [Policy Partners Pty Ltd](#) project manager to guide it through the initial phase of the project.

Policy Partners has distinctive expertise in the delivery of complex projects spanning multiple stakeholders across industry, government and the private sector. Policy Partners specialises in policy, strategy, economic and performance.

Based in Narrandera, [BioAg](#) manufactures a range of natural fertilisers and biostimulants that are perfectly suited to traditional farming enterprises, but also those looking to increase the sustainability of their land.

The BioAg range includes approved inputs for organic farmers and growers.

The [Riverina Organic Farmers Organisation](#) is an inclusive group of organic farmers spread throughout the Riverina. Members have been meeting, working together and sharing organic farming knowledge since 1992.
